Heroin	202	180	10	10	33	37	198
Smoke Heroin ³	99	110	6	6	20	22	97
Sniff or Snort Heroin ³	160	146	5	7	24	28	158

*Low precision; no estimate reported.

-- Not available.

¹ Due to a questionnaire change in 2001, comparison of hallucinogen estimates (except lifetime) with prior estimates should be interpreted with caution. See Appendix C.² Refers to lifetime use of a needle to inject a drug that was not prescribed, or that was taken only for the experience or feeling it caused.³ These drug estimates are generated from data collected on a "non-core" module of the NHSDA questionnaire. Therefore, these estimates may be somewhat inconsistent with drug estimates based on data collected from the "core" modules because NHSDA data are not edited for consistency across the "core" and "non-core" modules of the interview.
